FINAL EXAMINATION
GEE-LTE – Living in the IT Era

Presentation: (50 points)

Create an IoT conceptual design presentation following the guidelines below.

1. **Overview**
   The IoT Conceptual Design Presentation focuses on proposing a smart solution using IoT technologies. Students must present a well-planned system design, discussing how devices, sensors, and data interact to solve a real-world problem.

2. **Objectives**
   By completing this presentation, students should be able to:
   a. Identify real-world problems solvable by IoT
   b. Design a conceptual IoT architecture
   c. Explain how data is collected, transmitted, and processed
   d. Demonstrate critical thinking and innovation

3. **Presentation Content**
   a. Introduction
   b. Problem Statement
   c. Proposed IoT Solution
   d. System Architecture
   e. Components and Technologies
   f. Data Flow Process
   g. Wireframing
   h. Use Case Scenario
   i. Advantages and Innovation
   j. Limitations and Challenges
   k. Future Improvements
   l. Conclusion

4. **Presentation Rules**
   a. Duration: 10-15minutes per group
   b. Each group consists of a maximum of 2 members
   c. Be prepared for Q&A

5. **Evaluation Criteria**

Criteria	**Excellent (10)**	**Good (7)**	**Fair (5)**	**Poor (3)**	**Score**
Problem Identification	The problem is highly relevant, well-explained, and justified	The problem is clear but lacks depth	The problem is somewhat unclear or weak	The problem is poorly defined or missing	10
	Excellent (15)	**Good (11)**	**Fair (7)**	**Poor (4)**	
System Design and Architecture	Complete, logical, and well-structured diagram with all components	Mostly complete with minor gaps	Incomplete or lacks clarity	Missing or incorrect architecture	15
	Excellent (5)	**Good (4)**	**Fair (3)**	**Poor (2)**	
Innovation & Creativity	Highly original and innovative idea	Some originality present	Limited creativity	No originality or copied idea	5

	Excellent (5)	Good (4)	Fair (3)	Poor (2)	
Feasibility & Practicality	Highly realistic and feasible design	Mostly feasible with minor concerns	Some feasibility issues	Not realistic or impractical	5
	Excellent (10)	**Good (7)**	**Fair (5)**	**Poor (3)**	
Presentation Skills	Confident, clear, well-paced delivery; all members participate	Generally clear with minor issues	Uneven delivery or lack of confidence	Poor delivery; unclear or disorganized	10
	Excellent (5)	**Good (4)**	**Fair (3)**	**Poor (2)**	
Visual Design (Slides)	Slides are clean, engaging, and visually effective	Good design with minor clutter	Some clutter or hard to read	Poor design; distracting or unreadable	5
TOTAL					50
